

FNP Sales Analysis Dashboard

This project presents an **FNP Sales Analysis Dashboard** built using **Microsoft Excel** to analyze sales performance and identify key business insights.

The dashboard provides an interactive view of **total orders, total revenue, average customer spending, revenue by occasion and category, top-performing cities and products, monthly sales trends, and hourly revenue patterns.**

Key Insights

- Analyzed **1,000 orders** and overall revenue performance.
- Compared revenue across different **occasions and product categories.**
- Identified **top cities and products by sales/orders.**
- Analyzed **monthly and hourly revenue trends.**
- Used interactive filters for **Order Date, Delivery Date, and Occasion.**

Tools & Skills

Microsoft Excel | Data Analysis | Data Cleaning | Pivot Tables | Charts | Dashboarding | Data Visualization | Business Insights

This project demonstrates my ability to transform raw sales data into an **interactive and easy-to-understand business dashboard** for data-driven decision-making.
